

## Soundcloud Edits

At this point I'm just posting your main Soundcloud account home page to the syllabus's projects page. The episodes should show up listed on your home page. At this point I'd like you to do a few cleanup/organizational things to make this more consistent and workable:

1. Display Name - If you want to change your "Display name" ("user..." in the URL), you can click on edit at the lower right of your main profile page banner when you are logged in. If you change it, please send me the new link. Some people have made it some version of their name, some the name of their podcast.
2. Title - If you haven't already, on your Episode #1, click on edit below the track and make the "Title" Podcast Title – Episode Title, and give it a little description in that dialog box.
3. Public - While in this edit screen, make sure Episode #1 is public. Some of them aren't showing up on your main home pages.
4. Analysis - If you are happy with your Analysis podcast, you can now make that public as well, but it isn't required. This will make it show up listed on your home page along with Episode #1.
5. Image - If you don't have an image up for your series, think about what might be appropriate and signify what the Podcast is about. Do some Google image searches for one, and update your page. Just hover over the main image circle in the banner, click on update image, and select from your desktop/computer.

If you look at the list on the Projects page and I don't have a final title for your Series, then send me the title via email so I can put it on my page. Of course, the profile and tracks should make this clear once you edit them, so just let me know when you edit.

Also let me know if you have any Qs or want me to edit anything else on my end. If you haven't gotten me the link for Episode #1 yet, I can help you during workshop or drop me an email and let me know how it's going!
